

# The Little Green Glass Shop Layout Frames

Layout Frames help keep your stained glass suncatcher in shape.

Our Australian-made Layout Frames are made from sturdy, 4.5mm acrylic and can be used in all steps of the stained glass process, including soldering. Just remember to wash your frames to remove any flux.

- Use as templates to hand draw your pattern, or use the PNG files to create your design digitally.
- Use while grinding to make sure your pattern fits within the shape.
- Use while copper foiling to ensure your pattern doesn't grow.
- Use while solder tacking your project together so it doesn't move out of place. A second set of hands!

If you have any questions, please send me a message on social media or by email [thelittlegreenglassshop@gmail.com](mailto:thelittlegreenglassshop@gmail.com)

## Instructions

- When tracing/cutting out your pattern, use the inside line of the Layout Frame shape.

## Using Procreate

- Create a new A4 canvas.
- Go to "Add", then "Insert a file".
- Select the Layout Frame PNG file.

## To Print

- Go to "Share" and then "PDF" and Print.

Are you drawing your pattern by hand? Simply trace around the Layout Frame, and you're ready to design your suncatcher.
